- Mansfield Residences, Santo Domingo, Angeles City, Pampanga, Philippines

Career Objective

A proactive and technically curious Full Stack Developer with experience creating dynamic web applications from interface to server logic. Aiming to contribute practical development skills in JavaScript-based technologies while gaining real-world experience in building secure, responsive, and maintainable systems.

Projects Overview

Linqly

Full Stack Social Platform

- Designed and developed a full stack social web platform with interactive social features.
- Built a responsive user interface using React and Bootstrap.
- Implemented secure backend services with Node.js and Express.
- Integrated MongoDB for user and data management.
- Integrated an interactive map feature to enable location-based hangouts and real-time social discovery.

Thryve

MEVN-stack Health & Fitness Tracking Web Application

- Developed a MEVN-stack health and fitness web application using Vue, Node.js, Express, MongoDB, and npm.
- Implemented secure JWT-based authentication and account management.
- Combined workout, nutrition, hydration, and sleep tracking into one platform.
- Built visual dashboards and analytics to monitor user progress.
- Enabled customizable user profiles and daily health target settings through a responsive interface.
